Wireless Configuration Guide

Setup ulsecure Secure Access

Faculty, staff and students can set up secure wireless access using the built-in software tools of the Windows and Mac operating systems. Configuration instructions are available for Windows 10, Mac OS X, iOS, and Android operating systems. Note: If you do not see your device listed below, please refer to the basic UofL wireless settings, which are common across all platforms.

- Windows 10
- Mac OSX
- iPhone 4+
- iPad iOS 4+
- Chromebook
- Android 4.0+
- Eduroam
