

Research

Welcome to ITS Research Computing. Our Research Computing team provides and supports high-performance computing, storage and visualization resources both within and external to the University of Louisville. We work to understand your research computing needs and help you determine the resources best suited to your work. Most of our services come at no cost to the researcher, so whether you're a faculty member, postdoc, student or research lab staff member, we'd love to discuss your research computing needs. [Contact us](#) with questions or to set up an appointment.
